## Introduction

In compliance with the provisions outlined in House Bill 588 from the 2023 Legislative Session, AccelerateMS provides this annual report to serve as a comprehensive overview of the performance and impact of key initiatives, notably the Mississippi Workforce Enhancement Training Fund (WET) and the Mississippi Works Fund. These reports provide an interim assessment of the contributions made to the local and state economy, emphasizing value addition, fostering future economic growth, and advancing state objectives such as increasing the labor force participation rate. Furthermore, the report delves into the specifics of individual workforce training projects, offering insights into beneficiaries and associated progress and outcomes. Through this annual report, we strive to provide a transparent and detailed account of the multifaceted efforts and achievements in pursuit of our workforce development goals as mandated by House Bill 588.

## WET Funds

WET funds, managed by AccelerateMS in coordination with the Mississippi Community College Board, prioritize benefiting existing businesses in Mississippi by offering training for employees and potential employees as identified by companies. These funds aim to enhance employee productivity in core and horizon industry sectors through college-led, industry-led, or special project programs. Community colleges receive WET funds through several mechanisms including: allocated funds for open-to-the-public training programs, allocated funds for incumbent worker training through workforce regular projects, and awarded funds through basic skills projects, estimated annually through FAST plans. Basic Skills projects, also referred to as Adult Education, aim to offer fundamental instruction in various areas such as reading, math, writing, language (including English as a Second Language), HSE preparation, Smart Start Pathway Course, ACT WorkKeys® Curriculum, and Assessments leading to a National Career Readiness Certificate (NCRC). The Mississippi Office of Workforce Development, in collaboration with the Mississippi Community College Board, approves training requests. Measurable increases in employee outputs or market value of skillsets are essential for evaluating productivity and are reported and analyzed on an annual basis looking back 5 years, beginning in 2022. WET funds support core sectors like Advanced Manufacturing, Agribusiness, Construction, Distribution, and Logistics, Forestry, Energy, Chemicals, Health Care, and Information Technology. Additionally, Horizon sectors such as Blue Economy, Renewable Energy, and National Corporate Headquarters are eligible for support. The emphasis is on strategic partnerships, measurable outcomes, and sustainability in advancing workforce training and productivity.

Additionally, funds are awarded through 'special projects' which serve needs identified by companies that are new, expanding, or different from existing program needs. Special projects (advanced technology) are another mechanism designated for triage and horizon projects to bolster the pipeline of qualified workers in each ecosystem. The overarching goal is to advance workforce training and upskilling in the state to meet demands identified by existing industry partners. Special projects within the context of workforce development involve training initiatives that go beyond existing WET guidelines. Priority is given to non-credit, short-term training programs that address specific needs identified by industry partners or AccelerateMS. To be eligible, projects must be data driven, serve to enhance or increase training opportunities, and anchored by industry

need. The approval process for special projects occurs quarterly through a committee within AccelerateMS, comprising AccelerateMS and MCCB staff. The focus is on prioritizing opportunities that offer above-median-wage prospects for the ecosystem, as identified by AccelerateMS. This ensures a strategic and responsive approach to workforce development in alignment with current industry needs.

#### MS Works Funds

The MS Works Fund was established in the 2016 Legislative session to further grow the state's dedicated and skilled workforce to meet the demands of the state's new and existing businesses. There are three types of projects to be funded: Job Creation (JCP); Retention and Reskilling Projects (RRP); and Local Workforce Coordination (LWC). The Mississippi public community colleges system and its partners shall be the primary entities to facilitate the training associated with each of the types of projects, but other training partners are also eligible to provide training services based on the training plan approved by AccelerateMS. Eligible applicants are community colleges, state institutions of higher learning, and the local planning and development districts.
