## ABOUT MISSISSIPPI'S SLDS

---

Mississippi's Statewide Longitudinal Data System (SLDS) is one of the most comprehensive systems in the country and includes administrative records from more than 25 education, workforce, and human service agencies in the state. The SLDS allows for the alignment of multiple sources of de-identified administrative data over time to evaluate educational or workforce strategies in terms of real outcomes, such as entrance into employment, wages, and skill gains.

## PREPARED BY MISSISSIPPI STATE UNIVERSITY'S NSPARC

---

The National Strategic Planning & Analysis Research Center (NSPARC) at Mississippi State University is a nationally recognized research center that supports data-driven decision-making across workforce development, education, economic development, and public policy. With over two decades of experience, NSPARC specializes in integrating and analyzing data from multiple sources to address complex challenges faced by state agencies, policymakers, educational institutions, and private-sector partners. NSPARC's interdisciplinary team—including experts in sociology, economics, computer engineering, and public policy, along with professionals in data analytics and machine learning—produces research that is practical, actionable, and impactful. The center's collaborative approach and cross-domain expertise enable it to generate insights that help stakeholders design and implement solutions with real-world relevance.

To learn more, contact NSPARC at [nsparc@nsparc.msstate.edu](mailto:nsparc@nsparc.msstate.edu) or 662-325-9242.

August 2025

## REQUEST

---

Mississippi's SLDS Governing Board has requested summary information on the employment and earning outcomes of postsecondary students who graduated from Mississippi's community colleges and public universities from Academic Year (AY) 2005 to AY 2023.

The following information are requested:

- The number of graduates who earned a degree or certificate from Mississippi public postsecondary institutions.
- The number and percentage of postsecondary graduates who were employed in Mississippi and their median annual earnings in Fiscal Year (FY) 2024.

This report categorizes postsecondary graduates into four cohorts based on the academic year in which they attained their highest degree or certificate, as of AY 2024: 2005-2009, 2010-2014, 2015-2019, and 2020-2023. Results are broken down by cohort, highest degree or certificate as of AY 2024, and academic major using 2-digit Classification of Instructional Programs (CIP) codes.

## METHODOLOGY

---

### DATA

Data for this analysis come from the following SLDS contributors:

**Mississippi Community Colleges** – Contributed by the state's 15 community colleges and the Mississippi Community College Board (MCCB). Includes enrollment, county of residence, academic major, and graduation.

**Mississippi Public Universities** – Contributed by the state's eight public universities and the Institutions for Higher Learning (IHL). Includes enrollment, county of residence, academic major, and graduation.

**Mississippi Department of Employment Security** – Employer wage records from Mississippi's covered employment system. Includes quarterly earnings, company of employment, industry of employment, and county location of employer.

## MEASURES

**Postsecondary Graduates** – Graduates who earned their highest postsecondary degree or certificate from a Mississippi community college or public university as of academic year 2023-2024 (AY2024) and were not enrolled in any Mississippi public postsecondary institution during AY2024.

**Employment** – The number and percent of those graduates employed by a Mississippi covered employer in FY 2024.

**Median Annual Earnings** – The median annualized earnings in FY 2024 for those graduates employed by a Mississippi covered employer.

For this analysis, graduates were grouped into four cohorts (time periods) based on when they earned their highest degree or certificate: 2005-2009, 2010-2014, 2015-2019, and 2020-2023. Within each group, results are reported by highest degree or certificate and major.

These counts reflect the graduate's highest credential. For example, if someone earned both an associate degree and a bachelor's degree, only the bachelor's degree is included. This approach prevents double counting and focuses on the final outcome. The counts do not represent all graduates in a particular major, only those for whom that major was the highest credential earned.

## DATA SUPPRESSION

In accordance with SLDS Rules and Regulations, numeric values less than 10 were suppressed along with the accompanying percentages. These suppressed values were replaced with the "<10" symbol, and the accompany percent was replaced with the "---" symbol.

# RESULTS

## 1. MISSISSIPPI COMMUNITY COLLEGES

### 1.1 COAHOMA COMMUNITY COLLEGE
